### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Status of Claims***

In response to the Amendment filed on 4/19/04, Claims 1-23 are pending.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, *a first window on the first display device, the first display device having a first resolution, the first window including a number of pixels in a first and second direction and a second window on a second display device having a second resolution different from the first resolution, the second window including substantially the same number of pixels in a first direction as the first window and including substantially the same number of pixels in a second direction as the first window; a first test item on a first display having a first resolution, the first item being displayed in a window having a vertical and horizontal parameters defined in pixels and displaying the first test item on a second display having a second resolution larger than the first resolution, the first item being displayed in a window having vertical and horizontal parameters that are substantially the same as the parameters used to display the item on the first device* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should

Art Unit: 3714

include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The use of the trademarks MACINTOSH, WINDOWS, MAC OS 7, MAC OS 8, MAC OS 9, MAC OS X have been noted in this application. Applicant is required to review the specification for any other instances of trademarks and make the appropriate corrections. They should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Exactly how one arrives at the following results is not described in the specification: *wherein substantially the same amount of scrolling is required to view the question portion in the window on the first display device and on the second display device despite the different resolutions on the first and second display devices; wherein the same amount of scrolling is required to view the question portion in the window on the first workstation display device and the other workstation display device, despite the different display resolutions; wherein substantially the same amount of scrolling is needed to display the first test item on the first and on the second display; wherein a substantially uniform amount of scrolling is required to view the test item, regardless of the parameters of the display device..*

***Citation of Pertinent Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Boger (US 6,515,678)
  - manipulating display on devices with different resolutions to view video data
- Chang et al. (US 6,556,724)
  - resolution independent image collaboration

***Response to Arguments***

Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection (Claim 11). See rejection above. Therefore, this action is made NON-FINAL.
